I am Anushka, a web developer with over a decade of experience designing and developing a wide range of websites and web applications using a variety of technologies. I have a strong background in back-end development, with proven skills in Microsoft SQL Server, Oracle, Informix, and MySQL. Additionally, I have expertise in full-stack development for both web and Windows applications. My career began as a system engineer, where I gained experience maintaining networks, servers, and cloud databases. After discovering my passion for programming, I transitioned to a role as a back-end developer using Microsoft technologies, including C# and ASP.NET for web development, as well as database development for various RDBMS.

As a freelancer, I expanded my skills into open-source projects such as WordPress and CodeIgniter, becoming a strong developer of WordPress plugins and themes. Currently, I specialize in developing modules and custom widgets for specialty frameworks such as Elementor and DIVI, as well as component development for ACF modules.

With my diverse skill set and extensive experience, I am confident that I can provide value to your team as a .NET and Oracle developer. Please visit my website, <https://www.anushka.pro>, for more information on my background and expertise.

Work Experience

Senior WordPress Engineer - Fulltime Remote

Euka Future Learning - Sydney
July 2025 to Present

Responsible for end-to-end development of Euka's web platforms, including custom plugin development, API integrations, and feature enhancements. Improved reliability and performance while supporting scalable learning and membership workflows.

Senior Full Stack WordPress Developer - Fulltime Remote

Omni-Pro.net - Oslo
November 2022 to June 2025

A Full Stack WordPress Developer designs and builds WordPress websites, develops custom themes and plugins, optimizes website performance, ensures security, and manages DevOps functions. They are proficient in HTML, CSS, JavaScript, and PHP, and possess knowledge of SEO, database management, and responsive design. Additionally, they collaborate with clients and team members to create functional and visually appealing websites. Furthermore, I have experience in developing a custom REST API framework to facilitate communication with React and Electron-based Windows applications.

Full-Stack WordPress Developer

Upwork

March 2009 to Present

Upwork Profile as Web Application Developer - <https://www.upwork.com/fl/anushkakrajasingha>

With over 12 years of commercial experience, I am a skilled web application developer specializing in modern languages and techniques. I excel in developing custom websites and applications using content management systems like WordPress and CodeIgniter, and I have extensive knowledge of PHP, MySQL, JavaScript, jQuery, HTML/HTML5, and CSS/CSS3. In addition, I am proficient in ASP.net, which I use for most web applications along with MS SQL.

I am well-versed in utilizing APIs to meet user requirements, and I have extensive experience with popular APIs like Google, Facebook, and Twitter, as well as lesser-known ones like Bit.ly, Credit Plus, Zillow, FedEx, and Encompass. As a detail-oriented developer, I am committed to delivering high-quality solutions that exceed client expectations.

Senior Tech Lead

SMARTSOFT - Austin, TX

November 2022 to February 2024

I am pleased to introduce myself as the lead technology expert and architect behind our company's recent project focused on AI models, with the invaluable support of Chat GPT. Throughout this endeavor, I had the privilege of designing and developing an AI-based chatbot powered by the innovative LangChain framework.

I also spearheaded the development of an ERP (Enterprise Resource Planning) system for another project. This involved utilizing C# and ASP.net, two popular programming languages for web development, to create a robust and scalable solution.

By utilizing C#, ASP.net, and Oracle, we were able to create a comprehensive ERP solution that addressed the company's specific business needs. The system facilitated seamless management of resources, including finance, human resources, inventory, and customer relationships, streamlining operations and enhancing overall efficiency.

Overall, my contributions to this ERP-related project demonstrate my ability to effectively utilize C#, ASP.net, and Oracle development technologies, along with my expertise in architecting and delivering enterprise-level solutions.

Full Stack WordPress Developer

Tribes.Work - Manchester January

2022 to September 2022

As a Senior WordPress Developer, I have extensive experience in developing custom Elementor modules for clients, working closely with the team to ensure that project requirements were met. Additionally, I was responsible for leading a project to migrate a WordPress CMS to a CraftCMS-based e-commerce application, which required complex payment integration.

Throughout this project, I utilized my expertise in WordPress and Craft CMS, with proficiency in PHP, MySQL, JavaScript, jQuery, AJAX, HTML / HTML5, CSS/CSS3, and SCSS to ensure a seamless transition. I have also worked extensively with external APIs such as Google, Facebook, Twitter, and Bit.ly, among others, to ensure smooth integrations with various platforms.

With a strong track record in full-stack development and a focus on delivering high-quality work that meets client needs, I am confident that I have the skills and experience needed to tackle any web development project.

Frontend Engineer

Pypestream - New York, NY
December 2017 to February 2022

As a skilled front-end and back-end developer with a focus on WordPress web applications, I bring extensive experience in developing and maintaining web applications for businesses. My expertise in contemporary design has helped me create and improve websites for clients, utilizing WordPress, PHP, AJAX, CSS3, and HTML5.

In addition to front-end development, I have a strong command of back-end data processing, with a focus on MySQL. My experience extends to JavaScript frameworks such as jQuery, React, and Backbone with underscore. I'm able to effectively handle a range of responsibilities, from full-stack development to database application creation, ensuring optimal outcomes for each project.

Senior Database Developer

CENTRAL FINANCE PLC - Colombo
January 2010 to December 2010

During my tenure as a Senior Database Developer, I demonstrated outstanding backend programming skills by successfully migrating IBM Informix 6 to Oracle 10g. I have extensive knowledge of logical and physical data modeling using normalization techniques. I have a proven track record of developing complex database objects in Oracle such as Stored Procedures, Functions, Packages, and Triggers using SQL and PL/SQL.

My proficiency in using Ref Cursor, External Tables, and Collections, and my knowledge of effective techniques such as Dynamic SQL, Collections, and Exception handling has allowed me to achieve efficient and effective database management. I have hands-on experience in SQL performance tuning using Cost-Based Optimization (CBO). I possess a strong understanding of key Oracle performance-related features such as Query Optimizer, Execution Plans, and Indexes.

In addition to my technical expertise, I have created Shell Scripts for invoking SQL scripts and scheduled them using crontab. As a Tech Lead, I have displayed excellent communication, interpersonal, and analytical skills, with a strong ability to perform as part of a team.

Senior System Architect

CENTRAL FINANCE PLC - Colombo
June 2009 to December 2009

During my tenure as a Senior System Architect, I demonstrated my expertise in application architecture by successfully redesigning a client/server, web-based application with web services to integrate with an existing Windows form application using C#.NET 4 and ASP.NET. I implemented the Model-View-Controller (MVC) design pattern to improve the application's performance and scalability.

As a system architect, I dealt with IBM Informix and Oracle 10g back-end databases. With my strong PL/SQL skills, I smoothly migrated the database from IBM Informix to Oracle 10g, resulting in outstanding performance.

Leading a team of six, I provided guidance and mentorship in both application and database development. In addition, I leveraged my expertise in IIS, VSS, and Active Directory to maintain the quality of the project and ensure its success.

Solution Architect

CENTRAL FINANCE PLC - Colombo

January 2009 to June 2009

As a Solution Architect, I spearheaded the revamp of the "CENFIN" Windows form application using C#.NET 3.5 and ADO.NET with a focus on improving its efficiency and functionality. Utilizing my expertise in web services and SOA architecture, I integrated XML technologies such as XSD and XPath, as well as Crystal Reports for robust reporting. I implemented version control using VSS and logging application block using Enterprise Library 3.1. With IBM Informix serving as the backend, I custom-mapped the Entity framework to ensure optimal performance and data consistency. My leadership and technical skills were instrumental in the successful completion of this project.

Analyst Programmer

Central Finance Company PLC - Colombo, LK

January 2008 to January 2009

As an analyst programmer, I served as the lead designer and developer for web and windows-based applications to support the business functions of the company. I was responsible for developing and maintaining company websites and web-based applications that addressed specific business needs. To achieve this, I utilized contemporary design principles to create clean and user-friendly web interfaces. My web and windows-based application development skills included the use of C#.NET, ASP.NET, VB.NET, AJAX, CSS, HTML/XHTML, and JavaScript. To handle the backend data processing, I used Oracle, MS SQL, and Informix databases.

System Engineer

FDK Lanka (PVT) Ltd

June 2006 to January 2008

As a system engineer, I had a diverse range of responsibilities that included IT-related administrative functions as well as systems development. Specifically, I was tasked with designing and developing the corporate intranet, as well as related web applications, to continuously improve productivity and standards. To accomplish this, I utilized my skills in CGI, Perl, Classic ASP, and ASP.NET 1.1 to analyze, design, and develop user requirements into effective software solutions.

Additionally, I was responsible for server and database administration to meet the company's requirements. I served as a server administrator for RedHat Linux, Windows 2000 server, and Windows 2003 server, and as a database administrator for Oracle 8i and MS SQL server 2000. Overall, I brought a broad range of technical expertise and experience to the role of system engineer, enabling me to effectively manage and optimize the company's IT systems and applications.

Education

Master of Science in Data Science with Distinction

Kingston University

November 2024 to November 2025

Higher National Diploma in Information Technology

Sri Lanka Institute of Advance Technology Education

January 2004 to June 2007

Diploma in information Technology

University of Colombo School of Computing

April 2007 to April 2009

Certifications and Licenses

Microsoft Certified Professional Developer

July 2010

Microsoft Certified Professional

July 2010

Microsoft Certified

July 2010

Certified Professional Developer

July 2010

Skills

- PHP (13+ years)
- JavaScript (10+ years)
- .NET (10+ years)
- Java (10+ years)
- SQL (10+ years)
- Oracle (6 years)
- MySQL (10+ years)
- WordPress (13 years)
- Google Webmaster Tools (5 years)
- CSS
- Microsoft SQL Server
- Bootstrap
- XML
- HTML5
